

2012 National Tournament Specimen List for Forestry
Organized to correspond to Audubon Field Guides of North American Trees

The species on the National Tree List are for the national competition. States will provide their own more limited lists, which will include an appropriate subset of species from the national list

This list is set up by plant families for the student's and coach's convenience. Participants are not expected to know family names for the actual event. Classification follows that of the National Audubon Society Field Guide to North American Trees.
