

## National Science Olympiad - May 21, 2005 - Division B

"We are proud of the high level of accomplishment of all competitors. Science Olympiad teams understand that winning gold medals at the state level is no guarantee that they will win a medal at the national level. Veteran coaches remind students that the national level is very competitive, for example, the top 20 teams could have perfect scores and only be separated by seconds. The scores are final and not subject for review. Recognizing that teams have high expectations and deserve every respect, Science Olympiad has instituted a rigorous review process for double-checking all of the 120 team scores for all 46 events at six different levels to verify that the scores are recorded correctly."
