

BOOMILEVER

Sample Boomilever & Testing Wall Diagram Front View – 2019

The Boomilever must be a single structure, with no separate or detachable pieces, constructed of wood and bonded by adhesive (3.a.)

The Boomilever pictured here is only one possible configuration that satisfies rules.

Testing Wall (provided by the Event Supervisor) is at least 30 cm tall, 40 cm wide and $\frac{3}{4}$ " thick (5.a.i.)
