

ROAD SCHOLAR B

Sample Activities & Tasks

These are sample questions/tasks/activities that will help prepare students for the 2025 season. This list is not all-inclusive and is representative of what students may be asked on tournament exams.

- a.** Use the map index to identify the map coordinates of a city.

- b.** Use a city inset map to compute the distance in miles and tenths along the roads from a museum to an arena.

- c.** What does it tell us if contour lines are very close together in an area?

- d.** Estimate the time of day that this satellite image was captured based on the observed shadows.

These are sample questions/tasks/activities that will help prepare students for the 2025 season. This list is not all-inclusive and is representative of what students may be asked on tournament exams.

e. Use the graphic to draw the boundary of the watershed for a creek.

f. How far will a supply convoy located at a certain point have to drive to reach the survivors of this town if the river floods and the bridge is washed out?

g. Additional sample questions and information for watershed and climate change impacts are on the Road Scholar event page at soinc.org.
