

ROBOT ARM

Actual Size Layout for the Competition – 2017

Instructions: Print the following pages on letter paper (8.5 inches by 11 inches), and check that your print settings have *Page Scaling* set to *None* or *Actual Size*.

Each page will print with crop marks in the corners that indicate overlap or excess areas, which can be either trimmed or overlapped when taping pages together. While assembling, measure distances to ensure that all distances match those detailed in the rules. Relative positioning of the pages included is shown below.

Event Supervisors: Reference official rules for proper setup of the Competition Area. Note that while a printout of the archery target is permitted, the rules specify that tape be used for outlining the Competition Area and Device Square.
