How to Use Elementary Science Olympiad Manuals for Summer Programming

An Elementary Science Olympiad Summer Camp is the perfect opportunity for elementary students to participate in hands-on science events. Each activity can be tailored to the needs and developmental levels of your campers. For the Gummi Bear Long Jump activity, for instance, younger campers can work with pre-made catapults, and older campers can build their own catapult. All of these activities build on the knowledge needed for middle school and high school science, as well as later success in Science Olympiad competitions!

Sample 5-Day Plan for Grades K-6
