Ring Gauge – 2018

Circular ring gauge with inside diameter of 8.0-8.1 cm, not weighing more than 10 g, that retains its shape and flatness when handled (5.f.)

The ring gauge pictured here is only one possible configuration that satisfies rules. Some other possible designs are included below.

8.0-8.1 cm

Some materials that may be suitable: plastics thicker than 3 mm (e.g. acrylic/plexiglass, polycarbonate, HDPE, delrin), aluminum thicker than 2 mm, slices from pipes for plumbing, plywood and other stiff woods

Some materials that may not be suitable: paper, construction paper, cardstock, thin cardboard, malleable wire (e.g. thin copper wire, insulated wire), pipe cleaners
